

- Have you sent an email to receive topic approval?

Yes

- Have you received feedback for your ER diagram?

Yes

And then **submit** a small progress report including:

- What you had completed before today's lab

Before today's lab I had up to part 4 created, however I needed to get approval from the professor to finalize my ER diagram and Business rules.

- The progress that you made today

In today's lab I was able to update all deliverables up to part 4, so I am now working on the DDL and taking screenshots of that step.

- Timeline of future steps.

Over the weekend I plan to finalize the DDL and tables and submit that part and then I will be able to insert the data and then begin planning my work for the Physical Design part of my project
